Comments = Dear Dr. Friedman,

I support the FDA's effort to fully implement DSHEA as intended by Congress. However, FDA's proposed rulemaking on structure/function claims, 21CFR Part 101/Docket #98N-0044, is totally unacceptable: I want to continue to intelligently choose my dietary supplements. .

I believe it is extremely important to preserve Section 6 of DSHEA which allows access to valuable health information on dietary supplements and health.

I do not want the FDA to redefine disease, which could restrict my information on preventive care and wellness.

Sincerely,

CC Lantz

98N-0044
